

## DESCRIPTION

The ALM938 series of 1550nm DFB laser modules are specifically developed for use as a narrow linewidth source in combination with an external modulator, such as the LiNbO<sub>3</sub> based Mach-Zehnder. All critical components, including optical isolator, TEC, thermistor, laser, and monitor photodiode are hermetically sealed in a butterfly package.

## FEATURES

- Low Relative Intensity Noise
- Narrow Linewidth (< 1 MHz)
- Internal TEC, Thermistor & Monitor PD
- 14 pin Butterfly Package
- High Optical Power
- Polarization Maintaining Fiber

## APPLICATIONS

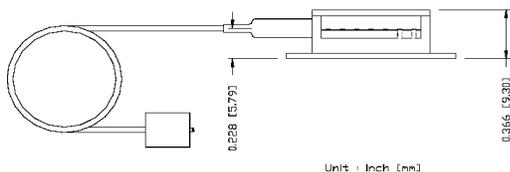

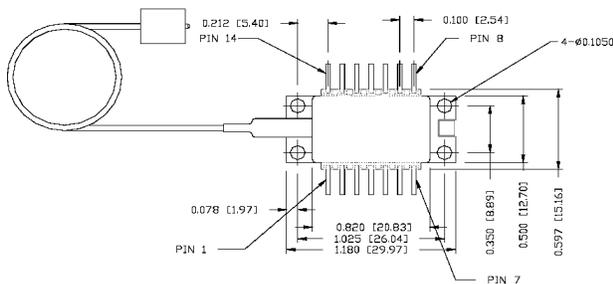

- RF over Fiber where high power, low RIN, and narrow linewidths are required
- Long haul for compensation of high-loss passive or active components
